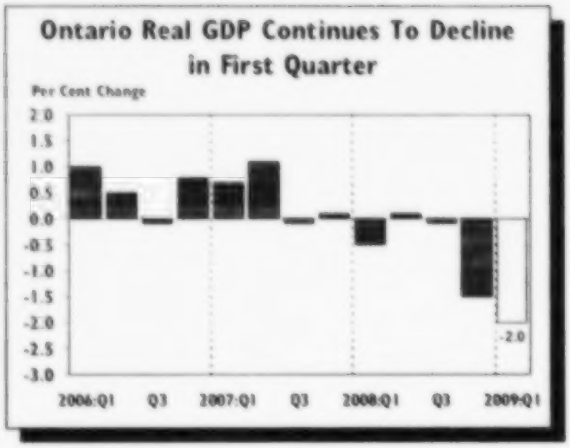
FIRST QUARTER 2009 SUMMARY



- Ontario's **real Gross Domestic Product (GDP) declined** 2.0% (-7.7% annualized) in the first quarter of 2009, following a 1.5% contraction in the fourth quarter of 2008. Canadian real GDP fell 1.4% (-5.4% annualized), the second consecutive quarterly decline. The U.S. economy contracted 1.4% (-5.5% annualized).

- The contraction of Ontario real GDP reflects the global economic downturn that was precipitated by financial market turbulence. Plummeting global demand, particularly in the U.S., resulted in a decline in Ontario exports. Ontario's real exports dropped 10.6% in the first quarter, following a 6.2% decline in the fourth quarter of 2008.

- Weak consumer and business confidence, reflecting the global economic downturn, affected Ontario's **final domestic demand**, which fell 1.4% in the first quarter, following a 2.3% decline in the previous quarter.

- **Consumer spending** fell 0.2% in the first quarter, following a 1.0% decline in the previous quarter. Consumers reduced purchases of autos and furniture and appliances.

- **Residential construction spending** dropped 4.6%, largely reflecting a drop in new housing construction which fell 10.5% in the quarter.

- The deteriorating economic climate led to a reduction in business investment in the first quarter. **Machinery and equipment investment spending** fell 10.9% while **non-residential construction spending** declined 4.1%.

- Both **imports** (-11.9%) and **exports** (-10.6%) dropped sharply in the first quarter.

- Ontario businesses reduced their real **inventories** by $6.3 billion ($2002) in the first quarter, after adding $0.9 billion in the previous quarter.

- In **current dollars, GDP** decreased 2.0% in the first quarter, after contracting 2.4% in the fourth quarter of 2008. Economy-wide prices, as measured by the **GDP implicit price index**, were unchanged in the quarter.

- **On an industry basis,** economic production contracted 2.2% (-8.5% annualized) in the first quarter of 2009. Declines were posted for both the goods (-6.8%) and services (-0.6%) producing sectors.

ONTARIO ECONOMIC ACCOUNTS: HIGHLIGHTS

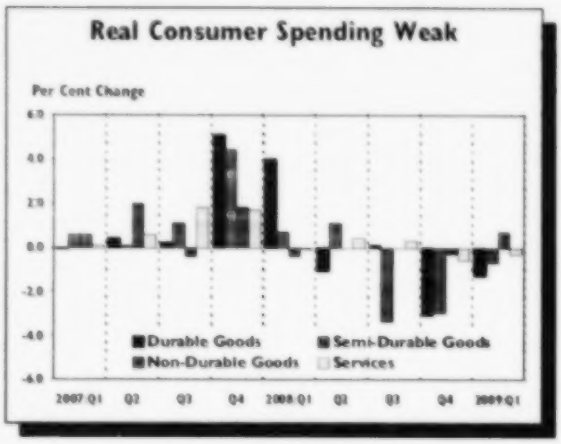
EXPENDITURE AND INCOME DETAILS

CONSUMER SPENDING DECLINES

Real consumer spending declined 0.2% in the first quarter of 2009.



Real spending on **durable goods** continued to fall, declining 1.3% in the first quarter, following a drop of 3.1% in the fourth quarter of 2008. Much of the contraction in durables spending was due to a 5.4% drop in motor vehicle parts purchases. Spending on furniture and appliances also decreased, falling 2.6%, following a 4.4% drop in the fourth quarter of 2008.

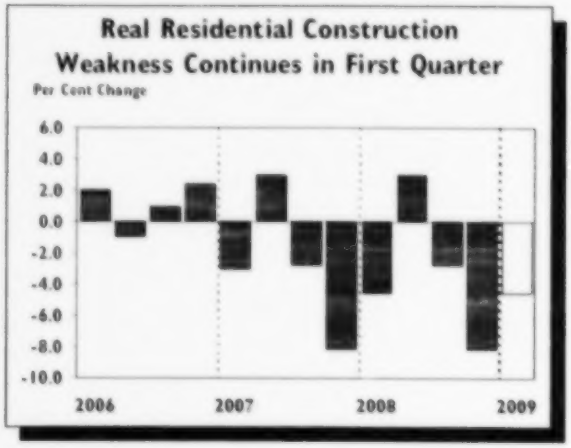
A 0.7% drop in real spending on **semi-durable** goods, such as clothing and footwear, also contributed to the slow-down in household spending.

Spending on **non-durables** increased 0.7% in the first quarter, following a modest 0.3% decline in the previous quarter.

Household spending on **services** dipped slightly by 0.3% in the first quarter, the second consecutive quarterly decline.

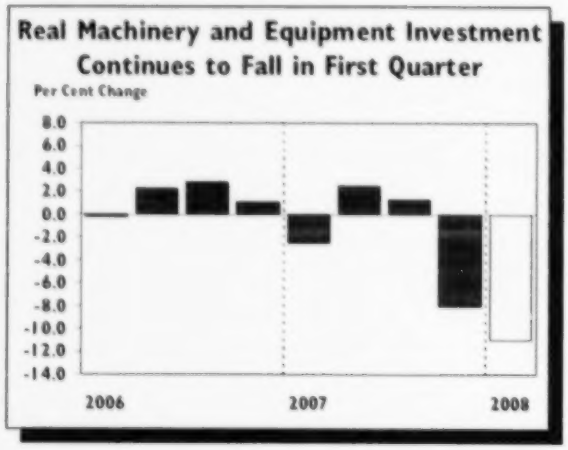
Residential Construction Spending Declines

Real residential construction investment declined 4.6% in the first quarter of 2009. This was largely due to a drop in new housing construction which fell 10.5%, reflecting a 19.7% decline in housing starts. A 1.2% rise in renovation activity helped offset some of the overall residential investment decline.



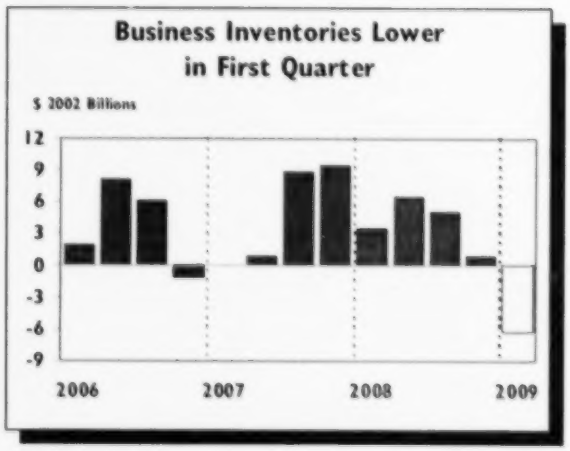
Business Investment Lower

Capital spending by Ontario businesses decreased in the first quarter **with real machinery and equipment** spending dropping 10.9% following an 8.0% decline in the previous quarter. Increasing prices for capital goods contributed to lower spending in the past two quarters. **Real non-residential construction spending** decreased 4.1%, the fifth consecutive quarterly decline.



Inventory Levels Reduced In First Quarter

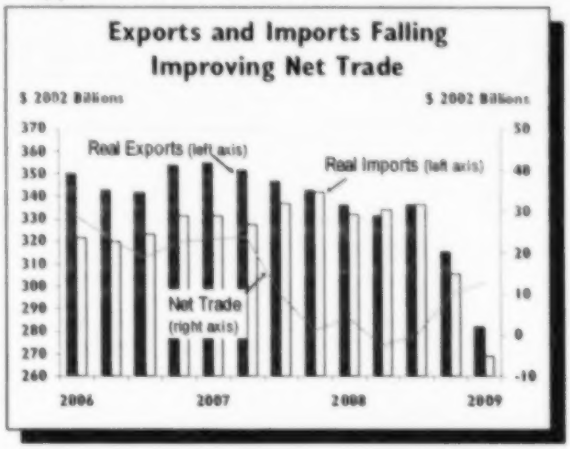
Ontario businesses reduced their **inventory** stocks by $6.3 billion in the first quarter following inventory additions averaging $4.0 billion over the previous four quarters. The first quarter inventory decumulation, the first since the beginning of 2007, was largely due to declines in motor vehicle stocks at the wholesale, retail and manufacturing sector levels. The decline in automotive stocks coincided with sharp declines in both domestic and export demand for new motor vehicles.



Exports and Imports Drop in First Quarter

Real exports fell 10.6% in the first quarter of 2009, the sharpest quarterly decline on record. The decline was due largely to the weak U.S. economy that slipped into recession in 2008. Ontario's international exports of goods declined 16.8%, with declines in exports of forestry products, industrial goods and materials, machinery and equipment and automotive products.

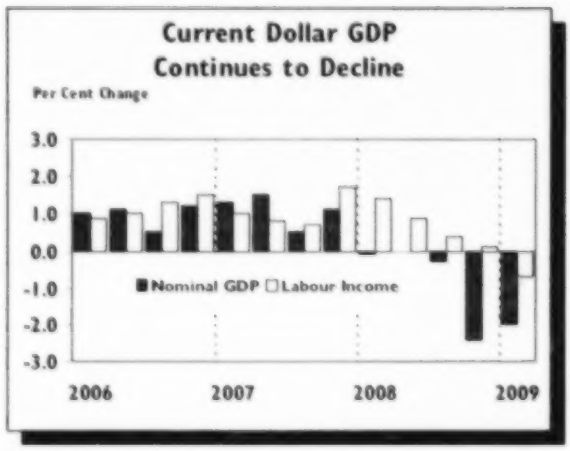
Real imports also dropped in the first quarter, falling 11.9%. Imports of automotive products, machinery and equipment and industrial goods and materials all posted significant declines.



Current Dollar GDP Falls in First Quarter

Ontario's **Gross Domestic Product measured in current dollars** contracted 2.0% (-7.8% annualized) in the first quarter, reflecting declines in labour income and corporate profits.

Labour income, the largest component of household income, declined 0.7%, reflecting a 1.7% decline in employment during the quarter. Falling labour income, coupled with declines in investment income, pushed personal disposable income down 0.6%. The **personal savings rate*** decreased to 4.4% in the first quarter from 4.8% in the previous quarter.



***Note**: Personal savings is calculated in the System of National Accounts as the difference between the amount households receive as income and their expenditures on taxes and personal consumption. It does not include changes in household wealth, such as financial assets, home equity or retirement savings.

Corporate profits (on a national accounts basis) dropped 25.9% in the first quarter, following a drop of 27.3% in the previous quarter. The fall in corporate profits was broad-based with significant declines in earnings in the financial, manufacturing, mining, construction and transportation sectors.

Economy-wide Prices Unchanged

Economy-wide prices, as measured by the **GDP implicit price index,** were unchanged in the first quarter, after falling 0.9% in the previous quarter. Falling energy prices provided significant downward pressure on overall prices. The Ontario consumer price for gasoline fell 8.5% in the first quarter following a drop of 22.0% in the fourth quarter. Weaker demand in the housing market also helped restrain overall prices. Residential construction prices fell 0.7% in the first quarter, after posting no change in the fourth quarter. The price of international imports increased by 0.6% in the first quarter, partially reflecting a 2.6% depreciation in the Canada-U.S. exchange rate. Higher international import prices helped to push up the price of machinery and equipment by 1.9% in the first quarter.

ONTARIO PRODUCTION BY INDUSTRY

HIGHLIGHTS

Real output by industry declined 2.2% in the first quarter following a 1.3% decrease in the fourth quarter of 2008. Output in both the services (-0.6%) and the goods-producing (-6.8%) sectors declined.

Production was down in the manufacturing (-8.6%), wholesale trade (-6.5%), construction (-4.3%) and transportation and warehousing (-2.8%) sectors. The financial (+0.2%) and retail trade (+0.7%) sectors posted gains in the quarter.

ONTARIO OUTPUT BY INDUSTRY

(% change from previous period, chained $2002)

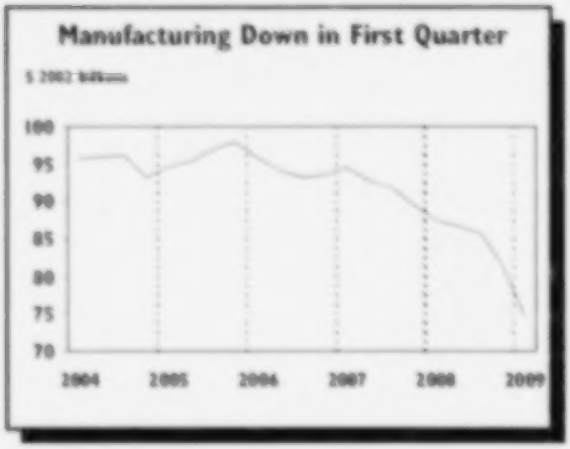
Ontario Output at Basic Prices	**2.2**	**-0.2**	**0.5**	**0.1**	**-1.3**	**-2.2**
(annualized rates)			*1.8*	*0.5*	*-5.0*	*-8.5*

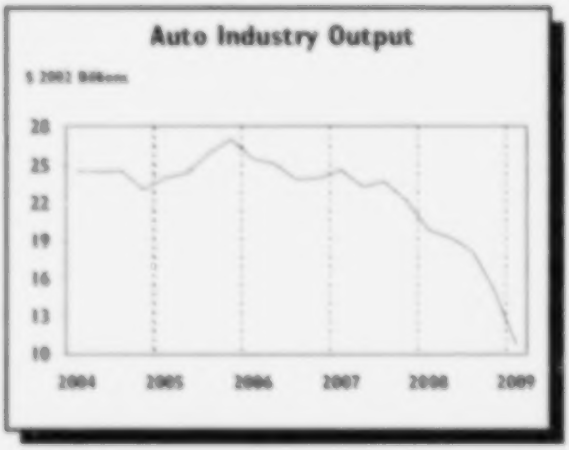
Note: Output by industry is defined as real gross domestic product (GDP) at basic prices in chained 2002 dollars. GDP at basic prices includes taxes net of subsidies on labour and capital inputs, but not taxes on final products.

Manufacturing Output Drops

The manufacturing sector's output fell 8.6% in the first quarter, the eighth consecutive quarterly decline. The first quarter drop in manufacturing accounted for almost two-thirds of the decline in total Ontario production.

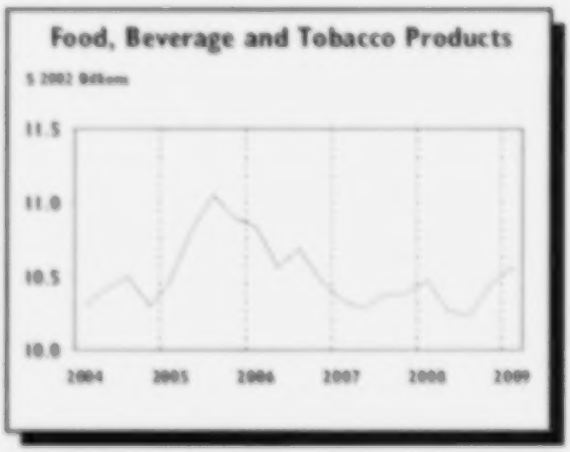


The decline in the transportation equipment sector (-18.8%) accounted for almost half of the overall manufacturing decline. Within this sector, auto production declined 27.8% as both motor vehicle assembly and auto parts recorded falls. Both industries encountered severe market downturns, which resulted in extended closures and slowdowns at numerous plants during the quarter.



Output reductions were also significant in the chemical and petroleum product (-7.5%), primary metal and fabricated metal product (-6.0%) and machinery (-10.3%) industries.

The food, beverage and tobacco products industry was the only manufacturing industry to post an increase in production in the first quarter (+1.1%), following a 2.0% increase in the fourth quarter of 2008.



Retail Output Edges Higher

Retail trade output rose 0.7% in the first quarter, rebounding from a 2.2% decline in the fourth quarter. Food and beverage stores led the overall growth in the retailing industry.

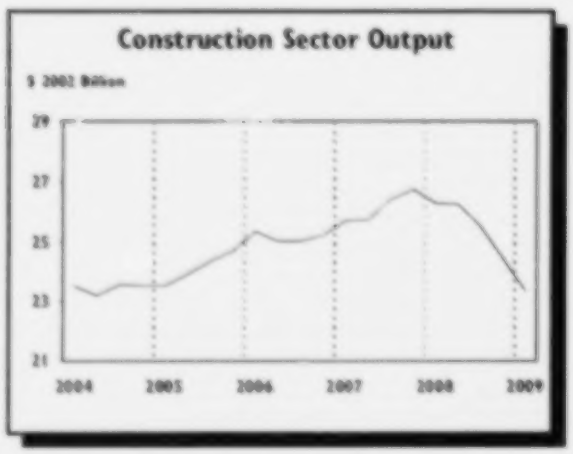
Wholesaling activity fell 6.5%, matching the 6.4% decline in the fourth quarter of 2008. While decreased activity was recorded across most trade groups, a significant decline in sales by motor vehicle wholesalers represented the biggest source of weakness for the sector.

Construction Sector Output Continues To Moderate

Construction sector output declined 4.3% in the first quarter, following a 4.4% drop in the fourth quarter of 2008. Activity was down in both the residential (-4.8%) and non-residential and engineering (-4.0%) industries.

Utilities output fell 2.9%, retreating after a 0.5% gain in the last quarter of 2008. An increase in natural gas and water distribution (+1.2%) was not enough to compensate for a decline in electric power output (-4.1%).

Mining output decreased 0.9% as demand for commodities such as copper and nickel weakened.

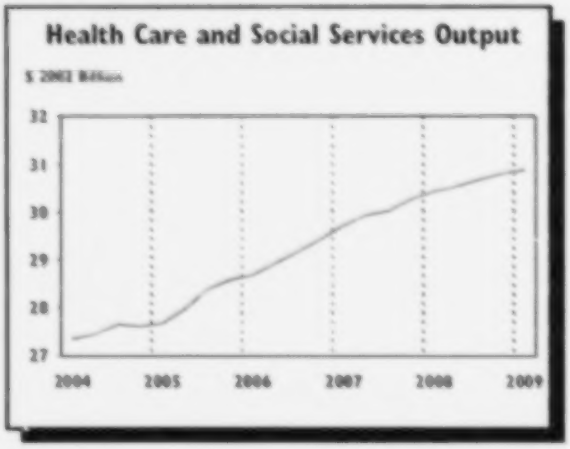


Output in the agriculture and forestry sector declined 0.7%.

Note: Construction industry output is measured by the value added of the industry. This is a different statistical measure than the construction investment spending estimates included as part of expenditure-based Gross Domestic Product.

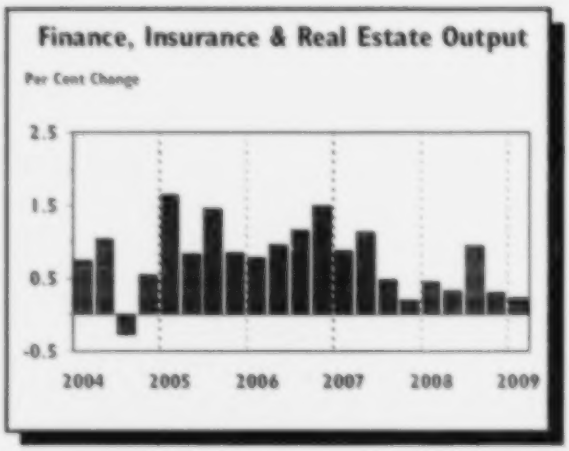
Health Care, Education and Public Administration

Production in the health care and social services sector advanced 0.3%, decelerating slightly from the 0.4% increase in the fourth quarter of 2008. Public administration output rose 0.4% while education services output edged down 0.3%.



Finance, Insurance and Real Estate

Output by the finance, insurance and real estate sector edged up 0.2% in the first quarter, following a 0.3% increase in the fourth quarter. Production gains in a number of financial sector industries, including insurance (+2.1%), more than offset a number of declines including other financial services* (-1.0%).



* "Other financial services" includes activities of real estate agents and brokers.

Other Service Sector Industries

Transportation and warehousing output fell 2.8% in the first quarter of 2009, partially reflecting urban transit labour disputes during January and early February.

Output of professional and administrative services fell 0.6%, the third consecutive quarterly decline.

Accommodation and food services output declined 1.3%.
